4th April, 2020

Dear Parents & Children,

Welcome to the new term! Who would have thought that we would be welcoming you like this?

Some truly unprecedented events have made us all house bound. These are also times that have made us value the small pleasures of life and also a lot of things that we may have earlier taken for granted. Quoting from a poem:

**'Years down the lane, you'll narrate stories of this time. When a virus united the world.
When distance made you realize your love for your loved ones.
When you wanted to live more, love deeper, work better.
When you learned the meaning of service.
When you remembered the last time you met someone with deep fondness
And waited to meet again.
When you started believing in prayers all the more!'**

With so much free time on our hands it's important to ensure that 'learning' continues for all our children.

For students of classes 3-5, the school will be uploading study videos created by our very own teachers which can be viewed by our children/parents. This will be backed up by interesting worksheets & study material which will make learning fun & meaningful for our children.

The time table for classes 3-5 will be as follows:

Day 1 & 2 (Monday & Tuesday): English & Math

Day 3 & 4 (Wednesday & Thursday): EVS & Hindi

Day 5 (Friday): An activity will be uploaded

The school understands the power of teacher interaction with the children. Therefore everyday the teachers will be uploading links to short videos where small concepts of the new academic year will be introduced. All worksheets/questions will be dictated by the teachers (plus uploaded) so that children do not have to depend on printing them. Teachers will discuss each worksheet/assignment on day 2 so that children can check their work.

Children must keep their work safely & neatly in a folder; which will be seen by their respective teachers once the school reopens.

All this will be uploaded on SnapHW by 9.00a.m every day. The children will be able to view the contents any time after that as per their convenience.

For Class 2, the school is uploading revision assignments on a weekly basis.

Parents must ensure that children take these classes & work diligently.

With the future being so uncertain, we need to be able to engage our children constructively.

Therefore this is an earnest endeavour on our part to keep the children involved & ensure a continuity in learning.

Warm regards,

Komal Sood
